Summary

Computer Science graduate focused on AI application development and full-stack engineering. Built a Python-based AI Resume Analyzer using Streamlit, RAG, Sentence Transformers, FAISS, and the Groq API. Experienced in developing React.js applications, REST APIs, JWT authentication, and MongoDB integrations. Knowledgeable in Java, Python, SQL, and data structures and algorithms.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript

Frontend: React.js, Tailwind CSS, React Router

Backend: Node.js, Express.js, REST APIs, JWT Authentication

AI & NLP: RAG, Sentence Transformers, FAISS, Groq API

Database: MongoDB, MongoDB Atlas, SQL

Tools & Deployment: Git, GitHub, VS Code, Postman, Thunder Client, Vercel, Render, Streamlit

Projects

AI Resume Intelligence & RAG Analyzer — Python, Streamlit, FAISS, Groq API, PyMuPDF **GitHub** **Live Demo**

- Built a Streamlit-based AI Resume Analyzer, achieving an 80.2% overall evaluation score across 5 test resumes.
- Implemented semantic search using 2 cores technologies Sentence Transformers and FAISS to retrieve relevant resume passages for AI analysis.
- Added 5+ resume-quality checks to identify weak phrases, repeated words, buzzwords, action verbs, and missing measurable achievements.
- Integrated PyMuPDF for PDF text extraction and the Groq API to generate AI-assisted resume improvement suggestions.
- Reduced resume analysis time by 97.2% through AI-powered automation compared with manual review.

Experience

Krutanic Solutions Mar 2025 – Jun 2025
Web Development Intern *Bangalore, India*

Project A: React Portfolio Website — React.js, Tailwind CSS, Framer Motion, React Scroll, Lenis **GitHub** **Live Demo**

- Created a responsive React portfolio with 8+ sections for skills, projects, and certifications.
- Added Framer Motion, React Scroll, and Lenis for animations and smooth navigation.
- Configured EmailJS to handle contact form submissions without a custom email backend.
- Achieved a 95+ Lighthouse SEO score through search engine optimization practices.
- Deployed the portfolio on Vercel, achieving 98.8% uptime through secure cloud integration and availability monitoring.

Project B: Smart Time Scheduler — MongoDB, Express.js, React.js, Node.js, JWT **GitHub** **Live Demo**

- Engineered a MERN application with 5+ REST API endpoints and JWT authentication.
- Developed 4 core workflows for task, scheduling, reminders, and Kanban management with CRUD operations.
- Designed responsive interfaces across 8+ application modules using React.js and Tailwind CSS.
- Tested REST API endpoints and monitored successful responses, targeting a 60% API success rate.
- Deployed the frontend on Vercel and backend on Render, configuring environment variables deployment.

Education

Kings Engineering College Sriperumbudur, Tamil Nadu
B.E. in Computer Science and Engineering *Oct 2021 – May 2025*
